Exp No:-10 Date:-

Aim:-
To learn how to add a network module to a cisco switch, connect multiple PCs and a server, assign IP addresses, & test connectivity in cisco packet Tracer.

Procedure:-

1) open cisco packet Tracer and set up workspace.
2) Drag and Drop a 2960-24TT switch.
3) Add three PCs and one server PT form & desired panel.
4) Power of the switch.
click the switch, open physical & turn off the power button.
5) Install AWIC-4ESW module on the switch:
In the physical, drag AWIC-4ESW into an empty module slot.
6) Power on the switch and let it boot.
7) Test connectivity (From any PC-open command prompt & Ping other devices.

I/P:-

Devices:-

1 CISW 2960 - 24TT switch

1 HWIC - 4ESW network module

5 PCS (PC0 - PC4)

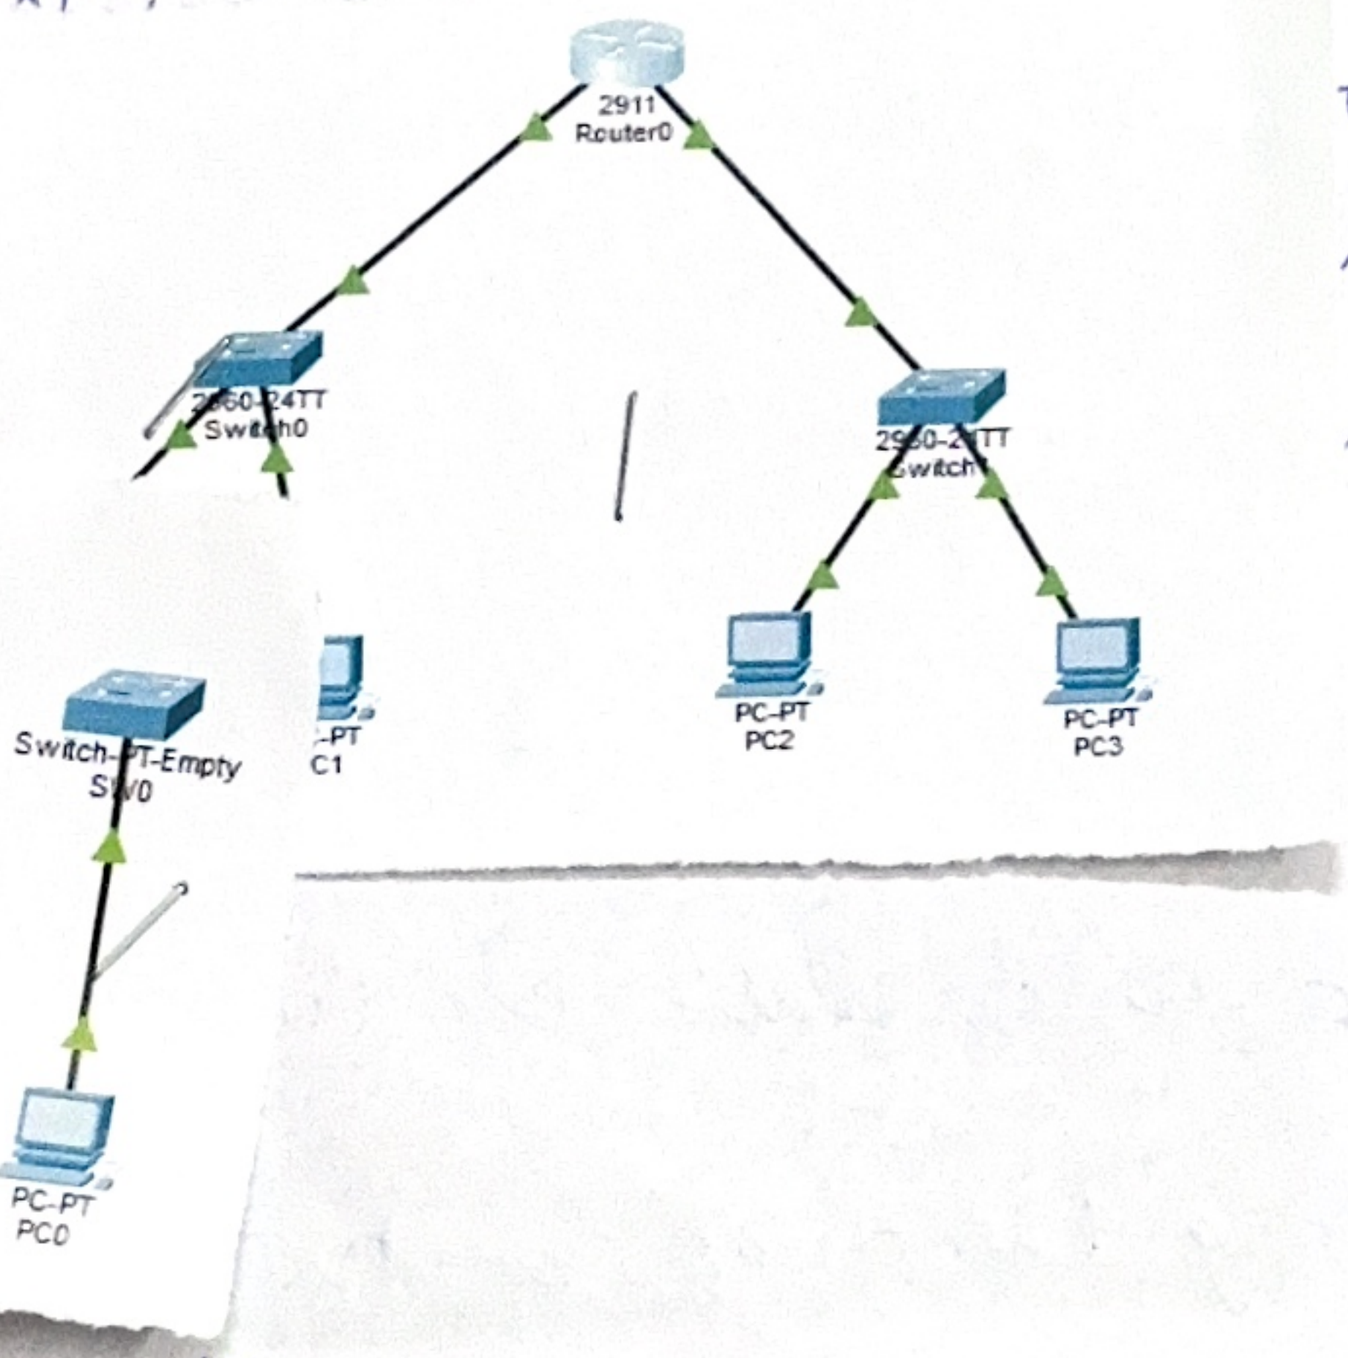

1 server - PTC (Server 0).

Cables:-

1. copper straight through cables. IP configuration

2. use static IP Addresses as listed above

where every PC & then My Bit in end with one functioning.

Result:-

The Experiment demonstrates successfully customization of a switch with a network module & connectivity between all devices the network work as expected & all devices communicates.
