NAME D.C. Bhargava Venkat SUBJECT Computer Networks

STD. _____ DIV. _____ ROLL NO. 241001032 SCHOOL _____

SR. NO.	PAGE NO.	TITLE	DATE	TEACHER'S SIGN / REMARKS
1		Linux & windows commands	17/07/2026	
2		Learning & Assignment of IP Address Manually to computer	23/7/2026	
3		Study of different types of Networks cables & crimping of cable with RJ45 connector	23/7/2026	
4		Implement Packet Sniffing using RAW sockets in Python	31/8/2026	
5		Develop a customized PING command to test server connectivity.		
6		Building Anonymous FTP Scanner using ftplib module	31/7/2026	
7		Develop A simple calculator using XML RPC	27/8/2026	
8		Develop A program to Reverse shell using TCP sockets		
9		Design A Simple topology And configure with one Router two switches and PCs using CISCO Packet TRACER	29/8/2026	
10		Customize switch with Network module using cisco Packet Tracer	21/08/2026	

SR. NO.	PAGE NO.	TITLE	DATE	TEACHER'S SIGN / REMARKS
11		Examine Network Addressing Translation using Cisco Packet Tracer	11/9/2026	
12		NMAP to discover Live Hosts using ARP scan, ICMP Scan, and TCP/UDP & PING SCAN in TRYHACKME Platform	25/9/2026	
13		Demonstrate Network Forensics using PcapXray Tool	28/8/26	
14		To capture, save, And Analyse Network Traffic on TCP/UDP/IP, HTTP/ARP/DHCP/ICMP/DNS using wireshark tool	01/10/2026	
15		To Analyse the different types of server using webalizer tools	8/10/2026	

List of Experiments	
1	Basic Networking Commands in Linux and Windows operating systems
2	Learning and Assignment of IP Address manually to computers
3	Study of different types of Network Cables and Crimping of cable with RJ45 connector
4	Implement packet sniffing using raw sockets in python
5	Develop a customized ping command to test the server connectivity
6	Building anonymous FTP Scanner using ftplib module
7	Develop a simple calculator using XMLRPC
8	Develop a program to create reverse shell using TCP sockets
9	Design a simple topology and configure with one router, two switches and PCs using Cisco Packet Tracer
10	Customize Switch with Network Modules using Cisco Packet Tracer
11	Examine Network Address Translation (NAT) using Cisco Packet Tracer
12	Nmap to discover live hosts using ARP scan, ICMP scan, and TCP/UDP ping scan in TryHackMe Platform.
13	Demonstrate network forensics using PcapXray tool
14	To capture, save, and analyze network traffic on TCP / UDP / IP / HTTP / ARP /DHCP /ICMP /DNS using Wireshark Tool
15	To Analyze the different types of servers using Webalizer tool
	Contact Hours : 60
	Total Contact Hours : 105

Exp No:-1 Date:- 17/7/26

Aim:-
To execute basic linux & windows commands

Linux commands :-

Pwd :- Displays the current working directory
ls - lists files and folders in a directory.
cd - changes the current directory.
Mkdir - creats a new directory
rmdir - Removes an empty directory.
cp - copies files or directories.
mv - moves or removes files.
rm - Deletes files or directanary.
cat - Displays the contents of a file.
chmod - changes file or directory permission.

Windows CMD commands :-

dir - lists file and folders in current dir
cd - changes the current dir
Md or Mkdir - creates a new directory
copy - copies files
move - moves files or folders.
Rd or rmdir - removes an empty dir
del - deletes one or more files.
ren - Renames a file or folder.
type - Displays the content of a text file
cls - clears the command prompt screen.

Result :-

Thus, the execution of basic linux and windows command are executed successfully.
